

Super Caimano 75

Milan's favourite commercial coffee grinder
of choice

The Super Caimano 75 by Anfim in Milan Italy is a 75mm flat blade commercial grinder range. Super Caimano 75 operates and grinds at low revolution speeds of 800 rpm, which means it is super quiet and allow the grinder to maintain a cooler temperature while under maximum demand.

Titanium blades will maintain a sharp edge for blade longevity up to 3000kg of coffee.

The Anfim Super Caimano 75 models have gained wide support and acceptance as the grinder of choice now used by many of the world's best national baristas champions when competing in their own national competition or representing their country at the WBC (World Barista Competition).

The Anfim Super Caimano 75 delivers an extraction and cup quality espresso that is good enough for many national and world champion baristas, whether in a busy espresso bar to a competition environment.
