

DOMO BAR

VIBIEMME
Sistemi per caffè espresso

The first home espresso machine with commercial performance.

The Domobar from Vibiemme leads the way in espresso machines for home users.

Vibiemme launched the Domobar in 1983 as the first home espresso machine with commercial performance. The Domobar features the patented, original E61 group head, which is user friendly and has excellent heat characteristics resulting in superb quality espresso based coffees.

Setting the Domobar apart from many other home espresso makers is the patented Vibiemme commercial size E61 group head that allows this unit to produce exceptional espresso extractions.

For a good looking, well designed, and fully functional home espresso maker the Domobar is the perfect choice!

- Water/Steam double tap.
- Electronic water level control.
- Volumetric adjustable built in pump with by-pass valve and system pressure gauge.
- Available in gloss black bodywork, with special order full stainless steel bodywork.
- A special order option of directly plumbed (without tank) is available.

Boiler	0.75 litres copper and brass
Water tank	1.7 litres
Voltage	230 V
Power	10 amp
Water Safety System	Yes
Country of origin	Italy
Support	Toll free technical support 1300 326 326

La Vibiemme are based in Milan, and have an extensive history and credibility in the international market of manufacturing traditional espresso machines spanning over the past 40 years. The founder of Vibiemme was Mr Carlo Valente, also the founder of renowned FAEMA. The Faema espresso coffee machine's heritage began in 1945 by Mr. Valente. By 1961 he had introduced the E61 model. The design and patent of the E61 group head was overseen by Mr Valente and is still the most commonly used system even after 40 years producing superior espresso coffee results. With the wonderful espresso machine history behind Vibiemme, it is no wonder that Vibiemme machines are not only beautifully designed but also mechanically and technically refined to deliver superior cup results. Vibiemme still holds the design patent for the E61 group head which is used in conjunction with the E64 group head on their models.
