

GEH 300 - Steam Machine

To meet the Australian demand for volume milk based coffees and infused teas, ECA has the GEH 300 from Plus.

The GEH 300 is perfect for instant access to consistent hot water and for the additional supply of powerful dry steam on demand. Ideal for preparing hot water based beverages, or in assisting during peak periods for the preparation of textured milk for coffees. This slimline, high build quality, vertical boiler unit is suitable for tight spaces around the main espresso bar preparation area. The GEH 300 is easily integrated for mobile carts and markets. It should ideally be used as the primary hot water supply to ensure any cafe's continuous reliability and performance of the espresso machine without sacrificing the optimal cup quality of the espresso.

Available in stainless steel, it offers easy maintenance for busy service areas.
